

**Spokane CIRCULATION**  
LARGEST IN THE CITY.

**Purely Business!**  
The columns of a newspaper represent a cash value. No publisher can afford to give advertising "notices" free any more than a merchant can afford to give his counter-claims of dry goods or shoes. A newspaper is a legitimate business concern. Its columns are its stock in trade, and advertisements should be paid for, no matter in what part of the paper they appear.

**The Continued Calls**  
Upon The Ledger for free notices have become so burdensome that we are forced to publish the following terms:

**For Notices of Meetings, Executions, Sales, or other public notices where a fee is charged, and for obituary notices, remissions of respect, etc.** The Ledger will charge five cents a line, and hereafter this will be the reasonable rate. This, however.

**Does Not Include**  
notices of Lodge meetings or Church services, which must not exceed ten lines.

**Avoidance of Disputes.**

Misunderstandings are unpleasant. The rate for business leads in this paper is 10 cents a line for the first insertion and 5 cents a line for subsequent insertions. A customer orders a five-line local insertion in the paper. I'll tell you when to take out the ad, says the bookkeeper. But he forgets all about it. The notice runs for two months—24 times—the bill is \$12. When he finds out, there is a "kick" and a controversy, followed probably by an angry feeling. Now, to obviate this trouble, no "full" notice will be accepted hereafter. Let's have a definite agreement at the outset and the termination will be pleasant all around.

All matter for publication must be handed in before 9 o'clock in the morning of each day.

**HERE AND THERE**

If you have friends visiting you, or you are going away on a visit, please drop us a note to that effect.

Mrs. L. V. Davis has returned from Cincinnati.

Major William N. Stockton was registered in Portsmouth a day or so since.

The quantity of bananas shipped from West India and adjacent ports to the United States now amounts to 13,000,000 or 14,000,000 bunches annually, valued at considerably over \$30,000,000.

The State Central Committee of the National Democratic party in Kentucky has been called by Chairman Davis to meet in Louisville next Thursday. The organization will be maintained and made even more effective.

The beautiful sunshine and the big parade promise to draw a large crowd to the city today. Let us acquit ourselves as good citizens, thankful that the political strife is over and that Providence is smiling on us all.

Brightman Bros. have within the past two weeks paid nearly \$6,000 cash to Mason county farmers for hogs. These hogs have been shipped to an entirely new market—Fall River, Mass. The freight charges range from \$20 to \$30 a car.

Mr. John Peed, whose residence burned at Millersburg a few weeks since, has received \$4,500 insurance on his residence and \$300 on his furniture. Mr. I. M. Lane of this city has submitted an estimate for rebuilding the residence.

Brightman Bros. of this city have shipped eight carloads of fat hogs to the East—three last week and five this week. These hogs go via the C. and O., consigned to Fall River, Mass. This is a new "market of the word" that has been opened up to Mason county farmers.

Mr. James Austin died last night at 11 o'clock at the home of his son, Mr. James Austin, on Forest avenue, after an illness of one week.

Mr. Austin was in the 90th year of his age, and was one of the oldest residents of this city.

A family of five children survives him—three sons—Mr. Bruce Austin of Washington, D. C., Mr. Charles Austin of Cincinnati and Mr. James Austin of this city—and two daughters—Mrs. Anna Love of Falmouth and Mrs. Fannie Carter of this city.

The funeral will take place tomorrow afternoon at 2 o'clock from the residence on Forest avenue, services to be conducted by Rev. Dr. John S. Hays and Rev. D. D. Chapin.

**WITH WHIRLING WHEELS!**

The Model Sawmill of Messrs. W. B. Mathews & Co.

The Sawmill, Planing-mill and lumber industry constitute one of the principal factors in the business life of Mayville.

In fact, there is no similar city in the Ohio Valley that possesses equal facilities for the prompt and satisfactory supply of all that is needed in the modern house-builder's art.

Mr. William B. Mathews is the local pioneer in this industry, and from an humble beginning his energy and straightforwardness have resulted in the development of a model establishment and a generous patronage.

Twice burned out, the last time only a few months ago, his concern has risen from the ashes, each time larger than it was before.

The new structure, which is not yet complete in its details, is furnished with all modern conveniences and with machinery of the latest type. The circular saw has been discarded for the more recent Band saw, and it is but a few minutes from the rough log's contact with it until the finished planks, with straight edges and of equal length, are ready for the market. The "panchones" or slabs are rapidly wrought into laths, and that which cannot be converted into some marketable article finds its way to the furnace to supply steam for the establishment.

During a recent visit of The Ledger man he was shown through by Mr. Clarence L. Mathews, and he was gratified to notice the activity on every hand.

The new plant is a great pet with the senior of the firm, Mr. W. B. Mathews, and he was found in the midst of the machinery directing its movements—full of energy despite recent heavy losses by fire, and full of hope for the prosperous business that he thinks is now in store for all who labor for it.

It was highly gratifying to learn from the Messrs. Mathews that the firm had received several handsome orders since the election, and that they had enough work on hand to keep them running steadily.

**APPEAL FOR HELP.**

Editor Zoller of Mt. Olive is Over-taken By Misfortune.

My entire printing plant, including office buildings, the accumulation of nearly twenty-five years patient toil and pinching economy, was destroyed by fire Tuesday night, entailing a loss of \$4,000 or more, with no insurance, the frame construction and location of buildings barring insurance.

The subscription lists, subscription ledger, two daybooks, two ledgers, printers' books and catalogues, files of papers for years past, a mass of miscellaneous literature, all my private and business correspondence, in fact everything in the office near and dear the printer's heart, went up in flames in a twinkling.

How the fire originated God alone knows. When discovered the Northwest corner of the main building, on the outside in the little alley way leading from the street to my office garden, was aflame.

The little fire engine, over which there has been so much wrangling and contention, and the heroic work of the volunteer firemen, alone saved the town from almost total destruction, as a furious gale was blowing at the time.

Crushed as I never was before, shattered in health and strength, but left an ambition and determination that the causing of the heart's action alone will still, I will gather together the few fragments left me, and with the generous help of the people, begin life anew.

The full wealth of my heart goes out to the many noble friends who so generously have assured me of substantial aid in the great loss and bitter desolation that have befallen me, and no action of mine will cause them to regret their generosity.

I have no means at present, except memory, to reach my friends and patrons, and through the courtesy of the press who give this place in their columns, and I hope they will place to my relief in this hour of sorest trial.

The Tribune Democrat will rise from the ashes.

JOHN W. ZOLLER.

[Any contribution sent to THE LEDGER for Mr. Zoller's benefit will be promptly acknowledged.]

**TIME**

is what I want to talk to you about now. Very few things are so easy to lose and so hard to regain as time. Is your watch time right? Does it lose time? Perhaps it gains? Either way will keep you guessing. I repair watches so you don't have to do any guessing. There are two reasons why I pay so much attention to watch repairing. I make money out of it of course—that's what I'm in business for—but best thing about it is that it brings good people into the store, and as I do watch work right, and at the right price, it is a convincing argument that the rest of my business is right too. Watch Repairing, however, is only a side issue. I sell Watches, Diamonds, Jewelry, Clocks and a great variety of beautiful and useful things for gifts of all kinds. **BALLENGER, the Jeweler.**

**Y. M. C. A. NOTES.**  
Something of Interest to the Young Men of Mayville.  
How bleak and cold are these November days. I find the week days long enough, tomorrow is Sunday, dull, dreary and with no place to go. Thus many young men in our city will soliloquize, and yet, is there any excuse for such dismal, blue view of time, daylight and opportunity? Humane men, practical, working men, are constantly aiding young men if they will but accept the offer. For instance, if you are one of this desolate class, just heed the advice here offered, accept and now carry out your intention, come to the Men's Rally tomorrow afternoon in Masonic Temple at 3 o'clock promptly and spend an hour in singing church, soul stirring songs, hearing good music and listening to an address by Mr. Dutcher on "For What Do I Live?" and if you do not go away owing to come again their potatoes are hickory nuts. Now, as you come, bring your chum with you. Room open from 3 until 8 o'clock; warm, cheerful, and with tables full of reading matter, from which you get instruction, joy and knowledge.

A gentleman from Delaware reports that every manufacturer in that state is getting ready to resume work on full time, and that he knows of more orders contingent upon the election than have been received there for a year past. A

One would think that the bicycle business could not have been more flourishing, but dealers interviewed yesterday said that their businesses had received an unexpected impetus from the success of Sound Money. In Syracuse yesterday the firm increased its force in two factories from 300 to 750 men. Some time ago another Syracuse firm had received orders contingent on the election of McKinley, and yesterday it began the manufacture of 1,000 wheels.

get himself elected by Free-silver votes to a place in the Senate, where he himself will vote for silver whenever the opportunity offers. It is time for the Sound Money men of both parties to be on the alert."

"If some others who are now abusing him in order to boost themselves for the Senate were to measure the insignificant part they took in the campaign by his splendid efforts, the contrast would evoke only mirth and ridicule. Governor Bradley is not a candidate for the Senate. The pretense that he is effecting an organization is without foundation. His ability and position have caused favorable comment at home and abroad. He did not visit Mr. McKinley on Sunday last, but went to Cincinnati on Saturday to have his throat treated, and on Sunday was with his daughter."
